

AHMED ABDELGWAD

AI Engineer

+20 100 978 0937 | ahmedabdelgwa135@gmail.com | Alexandria, Egypt

www.linkedin.com/in/ahmed--abdelgwad | [GitHub](#)

PROFESSIONAL SUMMARY

AI Engineer graduate specializing in Generative AI, Agentic AI, Advanced RAG Systems, and Computer Vision. Skilled in Python, LangGraph, LangChain, Transformers, and deep learning frameworks, with hands-on experience building and deploying real-world AI agents and RAG pipelines. Seeking an entry-level AI Engineer role to apply my skills in production-grade AI systems.

EDUCATION

Bachelor's Degree in Computer Science and Artificial Intelligence

Pharos University in Alexandria

2022 - 2026

Grade: Very Good

PROFESSIONAL EXPERIENCE

Python & AI Instructor (Part-time) - Black Horse Courses

Apr 2026 - Aug 2026

- Taught Python and AI fundamentals through the Shababna Initiative.
- Mentored students in hands-on AI projects and problem-solving.
- Connected academic concepts with practical industry applications.

Generative AI Intern | Digital Egypt Pioneers Initiative (DEPI)

Nov 2025 - Jul 2026

- Specialized in Generative AI, including LLMs, GANs, and Hugging Face.
- Developed skills in NLP, Attention Models, Deep Learning, and Transfer Learning.
- Covered the AI lifecycle from data preprocessing to Generative AI projects.
- Applied Python, PyTorch, and modern AI frameworks to real-world scenarios.

CERTIFICATIONS & TRAINING

Diploma in Machine Learning | GSkilled Academy

Apr 2025 - Mar 2026

- Comprehensive curriculum covering Supervised and Unsupervised Learning (XGBoost, SVMs, PCA), focused on model optimization, hyperparameter tuning, and mastering data science libraries like Scikit-learn, Pandas, and NumPy

Advanced NLP Track | Route IT Training Center

July 2025 - Nov 2025

- Specialized in sequence-to-sequence modeling and modern Transformer architectures (BERT, GPT, T5), with hands-on experience in fine-tuning LLMs, implementing Attention mechanisms, and applying text processing techniques like NER and sentiment analysis

PROJECTS

- **Interactive AI Tourist Robot (Graduation Project)**

Developed HORUS, a multimodal museum guide robot with an agentic CRAG pipeline using LangGraph and Llama-3, achieving 94% faithfulness. Integrated LiveKit WebRTC for bilingual real-time voice interaction and implemented computer vision using MediaPipe, YOLOv8, and DINOv2 for gaze, gesture, and exhibit recognition.

- **AgriVinka: AI-Powered Plant Disease Diagnosis Platform**

Developed a multimodal AI agent using LangGraph, the PlantNet API, and verification nodes. Implemented hybrid vector/lexical retrieval with ChromaDB and BAAI/bge-m3, deployed with FastAPI for real-time interaction.

- **RAG-based Question Answering System**

Built a context-aware RAG-based QA system using Google Gemini API, LangChain, and ChromaDB for optimized vector retrieval.

TECHNICAL SKILLS

- Languages: Python, C++, Java.
 - AI & NLP: Large Language Models (LLMs), Agentic AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, Transformers (BERT, T5, GPT), Deep Learning, Machine Learning.
 - Frameworks & Libraries: PyTorch, TensorFlow, LangChain, LangGraph, Scikit-learn, Pandas, NumPy.
 - Vector Databases: ChromaDB, Supabase (pgvector), FAISS, Pinecone.
 - Deployment & Tools: FastAPI, Docker, REST APIs, Git, GitHub, VS Code, Google Colab, Jupyter Notebooks.
 - Model Evaluation: Precision, Recall, F1-score, AUC-ROC.
 - Specialized Areas: Generative AI (LLMs & RAG), Computer Vision, Data Preprocessing, Model Optimization, Sequence Modeling.
-

SOFT SKILLS

- Problem-solving, Teamwork, Communication, Time Management, and Adaptability.
-

LANGUAGES

- **Arabic:** Native.
- **English:** B2.
